

Announcement

Since October 20th, 2020 the collection of digitized parish register books of the Archdiocese archive of Maribor is available online!

You can explore 4,556 units of different register books (Baptism, Marriage, Death books) and look at good half a million scans from original parish books (exactly 531,291).

The collection covers the parish books for a period from 1597 to 1919 from the area of Archdiocese of Maribor - which is the entire region of northeastern Slovenia.

Online access to books is available free of charge via the website Matricula-Online, which has recently been a premium web resource for family and similar research in Central Europe.

<https://data.matricula-online.eu/en/>

The Archdiocese of Maribor has managed to secure funds for buying and setting up a modern data storage server necessary for the project. For fast and reliable operation of this equipment it is necessary to regularly maintain, update and - when necessary - replace used components. For this purpose we plan about € 800,00 EUR (\$ 950,00 USD) yearly, which we can't assure without contribution from family research community.

We kindly ask you to support the operation of Archdiocesan archive of Maribor with donation and in this way you will help us to maintain free online use of scanned old church registers. You can transfer your voluntary donation to:

[NADŠKOFIJA MARIBOR](#), Slomškov trg 19, 2000 Maribor, SLOVENIA
